

2011 ITS – Schedule C

Allocated Overhead Calculation

Schedule C – Allocated Overhead Calculation

The purpose of this Schedule is to determine the quantum of Enbridge Inc. related allocable charges to be included in the Older System operating costs for the purpose of determining operating costs as per Article 18.3. To ensure comparability, all net plant numbers reflect the original cost to the legal entity within the Enbridge group of companies originally owning the particular assets less the accumulated depreciation associated with those assets. The ratio used to calculate the Enbridge Inc. related allocable charges included in these calculations is based on the relative net property, plant and equipment as determined at the end of the preceding fiscal year for each of the entities included. This ratio will be determined in the same manner as depicted in the attached example:
